

Exercises: Arrays

Your top choices

- Create an array to hold your top choices (colors, presidents, whatever).
- For each choice, log to the screen a string like: "My #1 choice is blue."
- **Bonus:** Change it to log "My 1st choice", "My 2nd choice", "My 3rd choice", picking the right suffix for the number based on what it is.

See Solution

```
var choices = ['red', 'orange', 'pink', 'yellow']; for (var i = 0; i
< choices.length; i++) {
console.log('My #' + (i + 1) + ' choice is ' + choices[i]); }

for (var i = 0; i < choices.length; i++) {      var choiceNum = i + 1;
var choiceNumSuffix;
if (choiceNum == 1) {
choiceNumSuffix = 'st';
} else if (choiceNum == 2) {
choiceNumSuffix = 'nd';
} else if (choiceNum == 3) {
choiceNumSuffix = 'rd';
} else {
choiceNumSuffix = 'th';
}      console.log('My ' + choiceNum + choiceNumSuffix + ' choice is '
+ choices[i]); }
```
