

## Exercises: The DOM

### The Logo Hijack

*No homepage is safe from the logo bandit!*

- Open up [www.google.com](http://www.google.com) in Chrome or Firefox, and open up the console.
- Find the Google logo and store it in a variable.
- Modify the source of the logo IMG so that it's a Yahoo logo instead.
- Find the Google search button and store it in a variable.
- Modify the text of the button so that it says "Yahooo!" instead.

See Solution

```
var img = document.getElementById('hplogo'); img.width = 400; img.src  
= 'http://www.logostage.com/logos/yahoo.GIF'; var button =  
document.getElementById('gbqfba'); button.innerHTML = 'Yahoooo!';
```
